

Environmental policy

Olsbergs is a system supplier of electro-hydraulic control systems with overall responsibility for our products, with the aim of creating satisfied customers. Olsbergs strives in all situations to reduce the company's environmental impact both in the short and long term. We do this by taking the life cycle perspective into account throughout our operations and for our products.

We comply with applicable laws and binding requirements and work to constantly improve the environmental system to further reduce the company's impact on the environment. We are committed to protecting the environment and preventing pollution.

The company constantly works to reduce the use of environmentally hazardous substances in production and handles waste and hazardous waste according to regulations.

Through training and clear environmental goals that are communicated to all employees, hired personnel and suppliers, we create a commitment to environmental issues.
